What can you do?

Understand what measures your plant uses to monitor process safety performance.

Understand your role in recognizing and reporting process safety incidents so you can do your part to make your plant’s process safety measures useful and meaningful.

Read your plant’s process safety reports and statistics, and participate in efforts to improve performance.

For engineers and managers, the CCPS report above (44 pages) is available in Chinese, English, Japanese, Portuguese, and Spanish.

You don’t improve what you don’t measure!
